Irakli Oboladze

Engineer

I'm a former full-stack developer (3.5 years, JavaScript/Laravel/MySQL) now transitioning into Site Reliability Engineering and DevOps. My dev background gives me a sharp eye for detail and deep insight into system behavior under pressure. I'm actively building my SRE toolkit, Docker, Linux, CI/CD, Python, Bash, focused on automation, reliability, and scalable infrastructure. I don't just want to build systems, I want to make them faster, stronger, and fail-proof. This isn't a pivot, it's an upgrade. I'm ready to bring system thinking, hands-on execution, and relentless improvement to your team.

WORK EXPERIENCE

Front-End Developer
Upgaming

06/2024 - 12/2024   *Tbilisi/Georgia*

Achievements/Tasks

- Developed engaging casino games using TypeScript, JavaScript, HTML, CSS, and PixiJS, resulting in increased player retention and enhanced user satisfaction.
- Engineered HR management software with Vue.js, significantly improving usability, streamlining workflows, and reducing operational inefficiencies.
- Optimized front-end performance and responsiveness, reducing load times and improving overall user experience.

Back-End Developer
Redberry

01/2023 - 01/2024   *Tbilisi/Georgia*

Achievements/Tasks

- Developed and maintained robust backend solutions with Laravel and MySQL, leading to faster query performance and increased scalability.
- Created a Jira-inspired Chrome extension using Laravel Nova, streamlining task management workflows and boosting team productivity.
- Collaborated effectively with frontend developers to integrate backend APIs seamlessly, significantly reducing integration issues and project delays.

Junior Front-End Developer
**Redberry**

05/2020 - 01/2023   *Tbilisi/Georgia*

Achievements/Tasks

- Delivered key client projects like "Reformatics" (international law firm) and "Mexicana" (food-ordering platform), improving clients' online visibility and customer interaction.
- Designed and developed impactful advertising banners for notable brands like Turbo and Adjarabet, boosting user engagement.
- Built responsive, interactive websites using Vue.js, React.js, JavaScript, TypeScript, HTML, CSS, and SASS, enhancing user engagement by delivering intuitive, high-quality user experiences.
- Executed precise markup development on multiple projects, emphasizing clean, maintainable, and semantic code practices.

EDUCATION

Master of Technology - MTech, Information Technology
Georgian American University - GAU

09/2024 - Present   *Tbilisi/Georgia*
