

# Irakli Oboladze

## Automation Engineer

I began my career building front-end and back-end solutions with React, Java, and PHP, but I quickly realized there's something even more exciting going on behind the scenes: making sure everything is secure, reliable, and lightning-fast. Over time, I found myself drawn to pentesting, performance tuning, and how automated tests can completely transform a project's stability. That curiosity led me toward automation engineering, where I can blend all these passions—securing applications, optimizing performance, and automating processes—to keep software running smoothly. It's challenging, sure, but it's also a huge motivation for me to keep learning and innovating every day.

## WORK EXPERIENCE

### Front-End Developer UpGaming

05/2023 - 11/2023

Tbilisi/Georgia

### Front-End Lecturer Digital Institute

06/2023 - 07/2023

Tbilisi/Georgia

### Back-End Developer Redberry

10/2021 - 09/2022

Tbilisi/Georgia

### Front-End Developer Redberry

06/2020 - 10/2021

Tbilisi/Georgia

## EDUCATION

### Master of Technology - MTech, Information Technology

Georgian American University - GAU

09/2024 - Present

Tbilisi/Georgia

### Clinical Psychology SEU

08/2019 - 08/2021

Tbilisi/Georgia

## SKILLS

AWS

RestAssured

Pentesting

Appium

Jenkins

Selenium

Postman

JUnit / TestNG

Spring Boot

Git

Data Structures & Algorithms

Linux
